

WE WANT YOU ! for BLOCKCHAIN DATA SCIENCE

Are you looking for a job where you can learn a lot and get first-hand insights into one of the hottest topics on the planet?

We are looking for highly motivated students for about 10-20 hours per week.

Work can mostly be done from your home office if you have a laptop and internet connection.

Blockchain Data Science at Anyblock means different types of work, depending on your skills and preferences:

- Visualize data of hot crypto projects in graphical dashboards
- Research meaningful blockchain KPIs and develop the queries
- Dig deep into our data pool to identify patterns with machine learning techniques
- Work with client project teams to understand their requirements and develop custom metrics for them

Get in touch:

Freddy Zwanzger, CDO

<https://www.anyblockanalytics.com/>

Your profile:

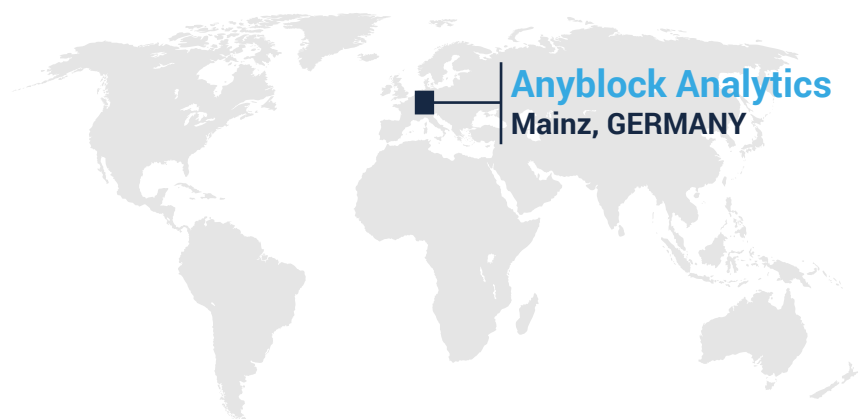

- Practical data science experience incl. development (e.g. SQL, ElasticSearch, Python, PHP, Java/Spark...)
- First blockchain know-how
- Fluent in English (reading/writing)
- Reliable and high quality standards for your work

Who we are:

Blockchain technology is transforming the way business is done in the digital world.

We are a small German startup with a lot of blockchain experience, both from the business/ economics perspective and from the development/ infrastructure technology side – and happy to share our knowledge with you!

Our main office is in Mainz-Gonsenheim, but we also work remotely quite often and feel at home in co-working spaces in Frankfurt (MindSpace) and Wuppertal (codeks) as well.
